**OMNICOMPETITION** nasce nel 1996; i primi anni di attività sono stati dedicati completamente allo sviluppo dei prodotti destinati al mercato dell'auto stradale e da competizione: distanziali ruota, dischi freno baffati e forati, kit dischi freno maggiorati.

*L'alta qualità delle materie prime impiegate, la precisione nelle lavorazioni ed il programma di ampliamento della gamma hanno consentito all'azienda di imporsi subito sul mercato nazionale ed europeo. Nel 2004 alla produzione tradizionale viene affiancata la progettazione di componenti per moto QUAD/ATV.*

*Inizialmente viene lanciata sul mercato una gamma di distanziali in alluminio e subito dopo, vengono realizzati prodotti molto più tecnici: assali e bracci sospensione costruiti interamente all'interno dell'azienda dalla progettazione al collaudo. Nell'ambito di una precisa strategia di espansione a livello europeo, **OMNICOMPETITION** si avvale di importanti collaborazioni sia interne, con un team di tecnici specializzati nel settore, che esterne con affermati team che hanno favorito il miglioramento e l'aggiornamento continuo dei prodotti.*

*Il servizio di assistenza tecnica è a disposizione per aiutare il cliente a identificare e a risolvere qualsiasi problema possa verificarsi nell'installazione di ogni prodotto della gamma.*

*Il 2010 segna un'ulteriore svolta per l'azienda, che conferma lo spiccato dinamismo con la riorganizzazione dell'organico interno e un susseguirsi di importanti cambiamenti. Nuovi progetti, numerosi investimenti mirati a migliorare la qualità dei prodotti (saldature certificate UNI EN ISO 15613:2005), conseguimento della certificazione TÜV CERT (per il sistema di gestione della qualità dell'azienda e per alcuni prodotti), nonché la promozione di nuovi articoli di punta rinnovati e migliorati, quali i kit bracci sospensione e le pinze freno, segnano l'inizio di un nuovo percorso e stimolano a nuove mete.*

*Qualità, innovazione, dinamismo e flessibilità sono punti cardine del lavoro del Team **OMNICOMPETITION**, disponibile a soddisfare qualsiasi esigenza dei clienti.*

**OMNICOMPETITION** was founded in 1996 and during the first years of activity it was mainly focused on the development of products for the automobile industry, both for street and competition: wheel spacers, grooved and drilled brake discs and big brake kits. Thanks to the high quality raw materials, the precision of the machining, and the continue widening of the product range, **OMNICOMPETITION** has immediately covered the Italian and European market.

In 2004 Omnicompetition started the development and production of atv parts as well. At the beginning a wide range of aluminium wheel spacers was launched in the market but soon **OMNICOMPETITION** started the development of more technical parts as well: axles and a-arms which are both completely produced within the company from the design/planning stage to the testing. Within a thorough expansionistic policy on the European market **OMNICOMPETITION** has important collaboration both within the company - with a team of technicians who are specialized in this field - and outside the company - with successful teams which enable the improvement and the continuous updating of products.

The technical service is always at disposal of the customer to find out and solve any potential problem or doubt while installing the products.

2010 marks another milestone for the company, affirming that its dynamic internal reorganization and concomitant major changes have been well planned. Many are the signs of this new reorganisation: new projects, new investments in order to improve the quality of **OMNICOMPETITION** products (welding is UNI EN ISO 15613:2005 certified), the TÜV approval on the management system and on some products, and the development of new main products which have been renewed and improved such as the new cross a-arms and the new brake callipers. All these important events mark the beginning of a new path and spur on new goals.

Quality, innovation, dynamism and flexibility are the cornerstones of **OMNICOMPETITION** team which is always willing to satisfy any need of customers.

**OMNICOMPETITION** est née en 1996. Les premières années d'activité ont été dédiées à la mise au point de produits destinés aux marchés de l'automobile de tourisme et de compétition: élargisseurs de voie, disques de freins rainurés et perforés kits gros freins.

Des matières premières de qualité, une fabrication de haute précision et une gamme de produit en constant développement ont permis à la société de s'imposer rapidement sur le marché national et sur celui européen.

En 2004 s'ajoute à cette production la conception de composants pour moto QUAD/ATV.

Après le lancement d'une gamme d'élargisseurs en aluminium suivront rapidement de nombreux produits beaucoup plus techniques comme les arbres et les triangles entièrement conçus et construits sur place. Dans une politique d'expansion au niveau européen, les techniciens hautement spécialisés de **OMNICOMPETITION** peuvent compter sur la collaboration d'experts externes qui leur permettent d'apporter de constantes améliorations aux produits.

Un service d'assistance technique est à la disposition du client pour l'aider à identifier et à résoudre d'éventuels problèmes liés à l'installation de tous les produits de la gamme.

2010 marque un tournant dans la vie de l'entreprise avec une réorganisation de l'organigramme interne qui a entraîné d'importants changements: de nouveaux projets, de nombreux investissements afin améliorer la qualité des produits (soudures certifiées UNI EN ISO 15613:2005), l'obtention de la certification TÜV CERT (pour le système de gestion de la qualité de la société et pour certains produits), ainsi que la promotion de certains articles de pointe revus et améliorés comme les triangles de suspension et les pinces frein. Tous ces changements marquent le début d'une nouvelle ère et l'envie d'aller toujours plus loin.

Qualité, innovation, dynamisme et flexibilité sont les fers de lance de la société **OMNICOMPETITION**, entièrement dévouée à satisfaire les moindres exigences de ses clients.

# CONFERMA

## Sistema di gestione in accordo alla legislazione nazionale tedesco ed internazionale per il traffico stradale

In accordo con le procedure TÜV AUSTRIA CERT si certifica, che l'azienda

**Omnicompetition S.r.l.**  
Via Dell' Artigianato 261  
I-37040 Santo Stefano di Zimella - Verona

applica un sistema gestionale per la qualità, conforme alle norme indicate sopra.  
Campo d'applicazione

**sviluppo, produzione e vendita di componenti per veicoli**

Per i gruppi

**02 sistemi frenanti**  
**06 distanziali ruota**

N° di registrazione del certificato: 20 102 1020054 04

Valdo fino a 2013-09-05

Organismo di Certificazione  
del TÜV AUSTRIA CERT GMBH

Vienna, 2010-09-05

La presente certificazione è stata condotta in accordo alle procedure di certificazione e di auditing del TÜV AUSTRIA CERT ed è soggetta a audits di sorveglianza regolari. Confermiamo, che per i prodotti indicati nel campo d'applicazione, il fabbricante soddisfa tutti i requisiti internazionali (Regolamenti ECE), europei (Direttive CE) e la legislazione nazionale tedesca sul traffico stradale, nel merito ad ottenere omologazioni dal Kraftfahrt-Bundesamt (KfzA - ufficio federale per la regolamentazione dei motorveicoli). Questa conferma contiene anche i requisiti dell'art. 33 del regolamento XXX del Codice Nazionale Tedesco della Strada, quindi anche applicabile per ottenere permessi dei componenti.  
TÜV AUSTRIA CERT GMBH - Krugstrasse 16 - A - 10116 Wien - www.tuv.at

# CONFIRMATION

## Management System as per German and International Road Traffic Laws

In accordance with TÜV AUSTRIA CERT procedures, it is hereby certified that

**Omnicompetition S.r.l.**  
Via Dell' Artigianato 261  
I-37040 Santo Stefano di Zimella - Verona

applies a management system in line with the above standard for the following scope

**development, production and distribution for vehicle components**

Approved product groups

**02 brakes systems**  
**06 wheel spacers**

Certificate Registration No. 20 102 102005404

Valid until 2013-09-05

Certification Body  
at TÜV AUSTRIA CERT GMBH

Vienna, 2010-09-05

This certification was conducted in accordance with TÜV AUSTRIA CERT auditing and certification procedures and is subject to regular surveillance audits. This is to certify that, for the items indicated as being subject to authorization in the scope, the manufacturer has complied with all the requirements of international (ECE regulations), European (EC directives) and German road traffic legislation which have to be met for obtaining type approval by the German Motor Traffic Agency (Kraftfahrt-Bundesamt). This certification includes compliance with the requirements of Annex XXX of the German Regulation Authorizing the Use of Vehicles for Road Traffic (StVZO).  
TÜV AUSTRIA CERT GMBH - Krugstrasse 16 - A - 10116 Wien - www.tuv.at

## DISTANZIALI OMNICOMPETITION

I distanziali ruota **OMNICOMPETITION**, vengono progettati e prodotti interamente all'interno dell'azienda. Sono ricavati da barre di alluminio di qualità certificata e vengono torniti con macchine utensili a controllo numerico che ne garantiscono la massima precisione.

Ogni kit di distanziali (2 pezzi) può essere fornito completo di bulloneria certificata, compatibile e/o adattabile in base alle esigenze della vettura stessa, ovvero conformemente alla bulloneria originale o al tipo di cerchio in uso. Consigliamo di fissare la bulloneria, con il carico fissato dalla casa costruttrice e di verificarne la tenuta dopo un primo periodo di utilizzo.

La precisione del distanziale, l'anello di centraggio (presente in tutti i modelli di spessore superiore ai 12 mm) e la bulloneria in dotazione, garantiscono un'installazione facile, veloce e perfetta.

Con l'installazione di distanziali la vettura acquista maggiore stabilità, in quanto la carreggiata risulta allargata e un aspetto più aggressivo.

Omnicompetition fornisce una gamma vastissima di distanziali e può realizzare distanziali a richiesta specifica del cliente, ovvero di spessori diversi da quelli riportati a catalogo o a doppia foratura per elaborazioni particolari (N.B. ricordiamo che i distanziali sono ad uso sportivo).

## WHEEL SPACERS

**OMNICOMPETITION** wheel spacers are completely designed and produced in the company. They are taken from certified quality aluminium bars and they are turned with CNC-machines which assure the maximum precision.

Each kit (2 pieces) can be delivered with certified bolts which can be compatible and/or adjustable to the requirements of the car, to the original bolts or to the installed rims.

It is suggested to fix the bolts following the instructions defined by the manufacturer and to check its resistance after a use span of time.

The high precision of **OMNICOMPETITION** spacers, the centring ring (in all models with more than 12 mm thickness) and the supplied bolts, assure an easy, fast and accurate installation.

Thanks to **OMNICOMPETITION** wheel spacers, the car will obtain higher stability because of the wider wheelbase and it will look more aggressive.

**OMNICOMPETITION** supplies a wide range of spacers and can produce particular wheel spacers on request, spacers with different thickness than those listed on the catalogue and with double PCD for special elaborations (NB: wheel spacers are for a sportive use).

## ELARGISSEURS

Les élargisseurs de voie **OMNICOMPETITION** sont entièrement conçus et réalisés à l'intérieur de l'entreprise. Fabriqués à partir de barres d'aluminium de qualité certifiée ils sont tournés à l'aide de machines outils à contrôle numérique, garantie d'une précision optimale.

Chaque kit d'élargisseurs (1 paire) peut être fourni avec la boulonnerie certifiée, compatible et/ou adaptable suivant les exigences du véhicule, c'est à dire conformément à la boulonnerie d'origine ou au type de jantes utilisées. Nous conseillons d'utiliser cette boulonnerie, avec la charge indiquée par le constructeur et de vérifier la tenue après un premier temps d'utilisation.

La précision de l'élargisseur, de l'anneau de centrage (présent dans tous les modèles d'épaisseur supérieure à 12mm) et la boulonnerie fournie, garantissent une installation simple, rapide et parfaite.

Avec l'installation d'élargisseurs le véhicule acquiert plus de stabilité car la voie en est plus large et il présente aussi un aspect plus agressif.

**OMNICOMPETITION** offre une large gamme d'élargisseurs et peut produire des élargisseurs sur demande spécifique des clients, c'est à dire d'épaisseurs différentes de celles proposées dans le catalogue ou à double perforation pour des élaborations particulières (N.B. nous vous rappelons que les élargisseurs doivent être utilisés pour un usage sportif).

**NEW!**

Nuova versione distanziali dedicata ad ultimi modelli AUDI • SEAT • VOLKSWAGEN con smusso del collarino di centraggio modificato.

New wheel spacers for the latest models of AUDI • SEAT • VOLKSWAGEN with chamfered centering ring.

Nouveaux élargisseurs pour les dernières models de AUDI • SEAT • VOLKSWAGEN avec l'anneau de centrage chanfreiné.

## NOTE - NOTES - NOTES

### Per una corretta installazione dei distanziali Omnicompetition consiglia:

*Prima di procedere all'installazione dei distanziali è necessario eliminare accuratamente con una spazzola metallica eventuali depositi di polvere o ruggine dai mozzi ruota. L'eventuale ingombro del coperchietto paragrasso dei cuscinetti ruota dovrà essere rimosso e rimontato al centro del distanziale. Per vetture che montano ruote diverse dalle originali, o alle quali siano state apportate modifiche all'assetto, è consigliabile avvalersi di centri specializzati per verificare la possibilità di installare dei distanziali.*

*Ad installazione completata, verificare eventuali ingombri ruote, affinché non ci siano interferenze con parti meccaniche o di carrozzeria.*

**A** - Su alcuni modelli utilizzabile solo per le ruote dell'asse anteriore perché il mozzo di centraggio delle ruote sull'asse posteriore è troppo lungo.

**B** - Consigliabile per le ruote dell'asse posteriore di tutti i modelli.

**C** - Su alcuni modelli utilizzabile solo per le ruote dell'asse posteriore, perché il mozzo di centraggio delle ruote dell'asse anteriore è troppo lungo.

**D** - Mazda, Mitsubishi, Nissan e Subaru montano delle colonnette differenti da anno ad anno e da modello a modello. Quindi, prima dell'ordine, si devono controllare i diametri dello zigrino "millerighe" dell'asse anteriore e posteriore. Le colonnette incluse nel Kit hanno lo zigrino Ø 14,2mm. Qualora le originali fossero di diametro diverso, Vi invitiamo a specificarlo.

**E** - Nissan monta delle colonnette differenti da anno ad anno e da modello a modello. Quindi, prima dell'ordine, si devono controllare i diametri dello zigrino "millerighe" dell'asse anteriore e posteriore. Le colonnette incluse nel Kit hanno lo zigrino Ø 13mm. Qualora le originali fossero di diametro diverso, Vi invitiamo a specificarlo.

**F** - Il kit include bulloni conici per cerchi after market con sede conica.

**G** - Il kit include colonnette a piantaggio.

**H** - Il kit include bulloni sferici per cerchi in lega originali con sede sferica.

**I** - Tutti i modelli di distanziali ruota per fuoristrada Omnicompetition sono forniti con dadi e colonnette premontate pertanto non è prevista la rimozione delle colonnette originali dal mozzo ruota. In alcuni modelli il centraggio dei distanziali ruota è possibile solo tramite le colonnette di fissaggio. E' consigliabile a montaggio effettuato, equilibrare i cerchi per evitare vibrazioni.

**L** - Questi distanziali hanno l'anello di centraggio da 22mm anziché 10mm.

**M** - Kit distanziali per cerchi in ferro.

**N** - Distanziali con centraggio.

**O** - Distanziali senza smusso interno posteriore e senza vite di fissaggio.

**For a correct installation of spacers Omnicompetition suggests:**

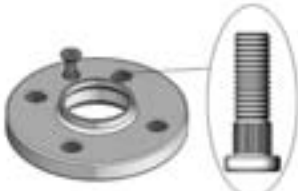

*Before installing spacers the deposits of dust or rust from the wheel hubs have to be removed with a metal brush. If necessary, the cover that protects the wheel bearing has to be removed and fitted it in the center of the spacer. If the car has wheels that are different from the original ones it is better to get in touch with a specialized center in order to verify the possibility to install the spacers. After fitting the spacers, you have to check that there are no interferences with mechanical parts or with the chassis of the car.*

- A** - On some vehicles you can use these wheel spacers just for the front axle wheels, because the hub of the wheels on the rear axle is too long.
- B** - It is advisable to use these wheel spacers for the wheels of the rear axle of all models.
- C** - On some vehicles these wheel spacers can be used just for the wheels of the rear axle, because the hub of the wheels on the front axle is too long.
- D** - Mazda, Mitsubishi, Nissan and Subaru can have different stud bolts for each year and for each model. Thus, before placing the order you have to check the diameter of the serration on the stud bolts of the front and rear axle. The stud bolts we supply with the kit have a diameter of 14,2mm. If the original stud bolts have a different diameter we kindly invite you to specify it.
- E** - Nissan can have different stud bolts for each year and for each model. Thus, before placing the order you have to check the diameter of the serration on the stud bolts of the front and rear axle. The stud bolts we supply with the kit have a diameter of 13mm. If the original stud bolts have a different diameter we kindly invite you to specify it.
- F** - The kit includes conical seated bolts for after market wheels with conical seat.
- G** - The kit includes stud bolts.
- H** - The kit includes spherical bolts for original alloy wheels with spherical seat.
- I** - All Omnicompetition spacers for off road cars are supplied with nuts and stud bolts fixed in the spacer; for this reason, the original stud bolts have not to be taken off from the hub of the car. In some models the centering is possible with the stud bolts only. After fixing the wheel spacers we suggest that the wheels are balanced in order to avoid any vibration.
- L** - These wheel spacers have a centering of 22mm instead of 10mm.
- M** - Wheel spacers for iron wheels.
- N** - Wheel spacers with centering.
- O** - Wheel spacers without rear inner chanfer and without fixing screw.

**Pour une correcte installation des élargisseurs de voie Omnicompetition conseille:**

*Avant d'installer les élargisseurs de voie il faut éliminer la poussière ou la rouille qui sont sur les moyeux. Si il est nécessaire Vous devez enlever le couvercle qui protège le coussinet de la roue et Vous devez le réinstaller au milieu de l'élargisseur. Si Vous avez une voiture qui a des roues différents de les roues originals il faut contacter un spécialiste qui Vous dira si Vous pouvez installer élargisseurs de voie sur la voiture. Quand Vous avez installé les élargisseurs Vous devez vérifier que rien interfère avec la carrosserie de la voiture.*

- A** - Sur quelques modèles, les élargisseurs ne peuvent être installés que sur les roues AVANT, car à l'arrière, le moyeu de centrage des roues est trop long.
- B** - Nous conseillons ces élargisseurs pour les roues arrière de tous les modèles.
- C** - Sur quelques modèles, les élargisseurs ne peuvent être installés que sur les roues ARRIERE, car à l'avant, le moyeu de centrage des roues est trop long.
- D** - Sur les véhicules Mazda, Mitsubishi, Nissan et Subaru différents types de goujon à tête peuvent être montés en fonction de l'année ou du modèle. Il est donc nécessaire, avant de passer commande, de vérifier le diamètre de la partie cannelée des goujons des roues avant et arrière. Les goujons à tête fournis avec le kit ont une partie cannelée de 14,2mm de diamètre. Si les goujons à tête du véhicule ont un diamètre différent, nous vous prions de bien vouloir nous informer.
- E** - Sur les véhicules Nissan différents types de goujon à tête peuvent être installés en fonction de l'année ou du modèle. Il est donc nécessaire, avant de passer commande, de vérifier le diamètre de la partie cannelée des goujons des roues avant et arrière. Les goujons à tête fournis avec le kit ont une partie cannelée de 13 mm de diamètre. Si les goujons à tête du véhicule ont un diamètre différent, nous vous prions de bien vouloir nous informer.
- F** - Le kit comprend la boulonnerie conique pour jante « after market » avec assise conique.
- G** - Le kit comprend goujons à tête.
- H** - Le kit comprend la boulonnerie sphérique pour jante d'origine en alliage avec assise sphérique.
- I** - Les élargisseurs de voie Omnicompetition pour 4x4 sont fournis avec des écrous et goujons à tête sertie dans les élargisseurs, Vous ne devez donc pas enlever les goujons d'origine du moyeu. Pour quelques modèles, l'anneau de centrage des élargisseurs n'est possible qu'avec les goujons à tête. Après montage, nous suggérons d'effectuer un équilibrage de roue afin d'éviter toutes vibrations.
- L** - Ces élargisseurs ont la bague de centrage de 22mm à la place de 10mm.
- M** - Ces élargisseurs sont pour les jantes en fer.
- N** - Élargisseurs de voie avec centrage.
- O** - Élargisseurs de voie sans chanfrein dans le côté intérieur arrière et sans vis de fixation.

- M1**  
 Distanziale senza bulloneria  
 Wheel spacer without bolts  
 Elargisseur sans boulonnerie
- 
- M2a**  
 Distanziale con bullone conico  
 Wheel spacer with conical bolt  
 Elargisseur avec boulon conique
- 
- M2b**  
 Distanziale con colonnetta a piantaggio  
 Wheel spacer with stud bolt  
 Elargisseur avec tiges à tête
- 
- M2c**  
 Distanziale con prigioniero e dado  
 Wheel spacer with pinbolt and nut  
 Elargisseur avec goujon et écrou
- 
- M3a**  
 Distanziale con bullone sferico  
 Wheel spacer with spherical bolt  
 Elargisseur avec boulon sphérique
- 
- M3b**  
 Distanziale con bullone piatto e rondella piatta  
 Wheel spacer with flat bolt and plain washer  
 Elargisseur avec boulon plat et rondelle plate
- 
- M4**  
 Distanziale a doppia bulloneria con colonnetta  
 Wheel spacer with double bolts with stud bolt  
 Elargisseur avec des doubles boulons avec tiges à tête
- 
- M5**  
 Distanziale a doppia bulloneria con brugola  
 Wheel spacer with double bolts  
 with socket head screw  
 Elargisseur avec des doubles boulons avec vis à tête

# BULLONERIA

## Bolts and nuts - Boulonnerie

La bulloneria OMNICOMPETITION è in classe di qualità 10.9 e viene prodotta in acciaio con metodo di stampaggio a freddo.  
La zincatura deidrogenata garantisce una eccezionale protezione anticorrosiva.

OMNICOMPETITION bolts are in the quality class 10.9 and they are made by cold steel press method.

The dehydrogenation zinking process offers an excellent corrosion protection to our bolts.

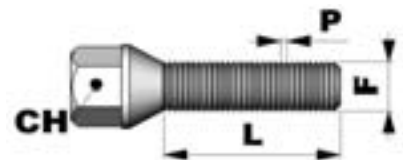

La boulonnerie OMNICOMPETITION, de classe de qualité 10.9, est réalisée en acier par estampage à froid.

Le zingage déshydrogéné garanti une excellente protection anti-corrosion.

## KIT IMPIANTI FRENANTI MAGGIORATI OMNICOMPETITION

I kit maggiorati **Omnicompetition** sono progettati per soddisfare le esigenze di chi vuole sostituire l'impianto originale con un prodotto più efficiente e che allo stesso tempo garantisca una frenata potente ma modulabile.

Gli impianti **Omnicompetition** forniscono ottime prestazioni in ogni condizione di utilizzo e per ogni tipo di auto, dall'utilitaria all'auto ad alte prestazioni.

E' possibile scegliere tra la "**Linea Sport**" e la "**Linea Premium**":

**Linea Sport:** dedicata a coloro che puntano prettamente ad un tuning estetico oltre che a migliorare la frenata nell'uso stradale.

Le fasce frenanti e le pastiglie freno utilizzate hanno infatti caratteristiche meccaniche ed elementi di lega che rendono questi sistemi frenanti maggiorati adatti ad uso esclusivamente stradale garantendo buone prestazioni e durata nel tempo.

**Linea Premium:** frutto di un accurato studio del materiale utilizzato per le fasce frenanti e dei vari componenti d'attrito per garantire massime prestazioni.

Le fasce frenanti hanno caratteristiche meccaniche ed elementi in lega studiati per un uso racing:

a differenza di quelle utilizzate nella linea sport sono molto più leggere ed hanno un sistema di ventilazione e raffreddamento molto più efficace, mentre le pastiglie hanno una mescola più morbida. Questi sistemi frenanti maggiorati sono adatti sia per un racing estremo su pista sia per un uso stradale.

Ogni kit maggiorato è composto da:

**2 fasce frenanti** con relative campane in Ergal

**2 pinze freno** in Ergal a 4 o 6 pistoni pompanti, verniciate a liquido, disponibili nei colori nero, rosso, blu

**2 staffe** per il fissaggio pinza-fusello, realizzate anch'esse in Ergal

**1 serie tubi** di collegamento in P.T.F.E. calzati in treccia metallica in acciaio

**1 serie pastiglie** freno di livello tuning o competition

**Bulloneria** in acciaio 12.9 utilizzata per l'assemblaggio del kit

Grazie ai numerosi tipi di staffe di adattamento, le pinze freno possono essere montate su ogni auto senza ulteriori modifiche, montando dischi di diametro e spessore superiori agli originali. Omnicompetition consiglia di sostituire, in fase di installazione, l'olio freni di serie con un olio specifico.

**Poiché sia la progettazione che la produzione avvengono interamente all'interno dell'azienda, Omnicompetition è in grado di sviluppare kit maggiorati anche su richiesta del cliente; Vi invitiamo quindi a contattarci per qualsiasi preventivo personalizzato.**

## OMNICOMPETITION BIG BRAKE SYSTEM KITS

**Omncompetition** big brake kits are designed to satisfy the requirements of those who want to substitute the original braking system with an Omncompetition one for a more sportive use. In this way they obtain a better braking performance, which assures a powerful but also modular braking.

**Omncompetition** braking system guarantees high performances in any use conditions and for any car model, from utility cars to high performance ones.

It is possible to choose between the "**Sport Line**" and the "**Premium Line**":

**Sport Line** is designed for those people who are interested in an aesthetic tuning and want to improve the braking for a street use. The rotors and the pads which are used in this kits have mechanical features and alloying elements which make these big brake system kits proper solely to a street use.

These kits guarantee good performances and long duration.

**Premium Line** is the result of an accurate study on the rotor material and on the other friction parts in order to guarantee the highest performances.

These rotors have mechanical features and alloying elements which are studied for a racing use: unlike those use in the Sport Line, they are lighter and they have a more effective ventilation and cooling system, while pads have a softer compound. These big brake system kits are proper both for an extreme racing on racetrack and for a street use.

Each **Omncompetition** big brake kit contains:

**2 rotors** with Ergal bells

**2 ergal calipers** with 4 or 6 pistons. They are liquid varnished and they are available in black, red, blue

**2 ergal brackets** to fix the caliper to the stub axle

**1 brake hose-pipe** kit in P.T.F.E, made up as metal braid in steel

**1 kit of brake pads** for tuning or competition

**Bolts in steel** 12.9 which are used for the assembly of the braking system

Thanks to the many kinds of matching brackets, Omncompetition calipers can be installed without further modifications in any car just installing discs with bigger diameter and thicker than the standard ones. Omncompetition suggests to substitute, while installing the kit, the standard brake oil with a specific oil.

**Being the design and production made within the company, Omncompetition develops big brake kits on customer request as well. We kindly invite you to contact us for any customized offer.**

## SYSTÈMES COMPLETS DE FREINAGE OMNICOMPETITION

Les kits gros freins **Omncompetition** sont étudiés pour satisfaire les exigences de qui a envie de remplacer les équipements d'origine par un produit plus performant garantissant par de même un freinage puissant mais modulable.

Les kits **Omncompetition** offrent d'excellentes prestations quelque soit les conditions d'utilisation et le type de véhicule, de utilitaire à la voiture haut de gamme.

Il est possible de choisir entre la "**Linea Sport**" et la "**Linea Premium**":

**Linea Sport:**

Les pistes freinantes et les plaquettes utilisés ont en effet des caractéristiques mécaniques et éléments d'alliage qui rendent ces systèmes complets de freinage aptes pour une usage sur route exclusivement, en garantissant bonnes performances et durée dans le temps.

**Linea Premium** est le fruit d'une recherche soignée des matériaux utilisés pour les bandes freinantes et les divers pièces de frottement afin de garantir des prestations optimales.

Les pistes freinantes ont des caractéristiques mécaniques et éléments d'alliage qui sont étudiés pour un usage Racing: contrairement à celles utilisées dans la ligne Sport sont plus légères et ont un système de ventilation et refroidissement plus efficace et les plaquettes ont une mélange plus souple. Ces systèmes de freinage sont aptes pour un Racing extrême sur piste comme pour un usage sur route.

Chaque kit gros freins est composé de:

**2 disques** avec leurs bols respectives en Ergal

**2 étriers de frein** en Ergal à 4 ou 6 pistons pompant, peint au liquide, disponibles en noir, rouge et bleu

**2 supports d'étrier** en Ergal pour la fixation pince – fusée

**1 série de tubes** de frein en P.T.F.E. revêtu d'une tresse d'acier

**1 série de plaquettes** de niveau Tuning ou compétition

**Boulonnerie** en acier 12.9 utilisé pour le montage du kit

Grâce aux nombreuses sortes d'étriers d'adaptation, les étriers frein peuvent être montées sur tous type de voitures sans apporter d'ultérieure modification, en montant des disques de diamètre et d'épaisseur supérieure aux originaux. Omncompetition vous conseille de remplacer, en phase de installation, l'huile de frein standard avec un huile spécifique.

**Comme la conception et la production sont entièrement réalisées à l'intérieur de l'usine, Omncompetition est en mesure de développer des kits gros freins sur demande du client. Nous vous invitons donc à nous contacter pour l'établissement d'un devis personnalisé.**

## NUOVE PINZE FRENO OMNICOMPETITION

Le pinze freno Omnicompetition vengono progettate e costruite esclusivamente all'interno del nostro reparto produttivo attrezzato con macchine utensili CNC che garantiscono la massima precisione nelle lavorazioni.

Sono ricavate da barre in lega di alluminio serie 7000, particolarmente adatta per questo impiego. Questa lega contiene principalmente zinco, elemento che aumenta la resistenza e la durezza, oltre a favorire l'autotemperabilità della lega stessa. Un volta trattata termicamente, la lega di alluminio di serie 7000 risulta essere estremamente leggera ed è dotata di un'elevatissima resistenza meccanica alla trazione (pari a un massimo di 5800 kg/cm<sup>2</sup>) e, per questo motivo, viene generalmente utilizzata per strutture aeronautiche e/o parti molto sollecitate di mezzi di trasporto.

Il nuovo design della pinza conferisce un ulteriore alleggerimento della stessa, pur mantenendo inalterate le caratteristiche tecniche e meccaniche.

Nelle pinze freno a 4 pompanti, sono alloggiati 2 pistoni di diametro 36 mm e 2 di diametro 40 mm mentre nella versione a 6 pompanti, 4 pistoni sono di diametro 32 mm e 2 pistoni hanno diametro 36 mm. Dopo anni di esperienza e numerosi test in pista e su banco prova, possiamo ritenere ottimale il rapporto tra quantità/diametro dei pistoni e la forza frenante. Specifichiamo che, a livello di prestazioni, risulta essere determinante il diametro dei pistoni: la quantità d'olio spinta da un pistone è direttamente proporzionale al suo diametro. Inoltre, il diametro elevato dei pistoni, garantisce un ampio appoggio sul piano di spinta della pastiglia e quindi il massimo grip tra pastiglie e pista frenante.

**Un'importante innovazione tecnica si evidenzia nel sistema di passaggio dell'olio all'interno della pinza: il circuito è aperto e circolare così da garantire la stessa mandata dell'olio su tutti i pistoni.**

La nuova pinza freno include anche una molla in acciaio armonico che, andando a contatto con le pastiglie freno, ne elimina le vibrazioni (A).

Lateralmente, si alternano spurghi e tappi (C) che permettono di installare la pinza da entrambi i lati, mentre superiormente è stato creato un apposito castelletto, come rinforzo per evitare che la pinza si pieghi anche minimamente (B).

E' del tutto rinnovato anche l'innesto del tubo freno: è stata infatti creata una cremagliera per escludere qualsiasi possibilità che il fissaggio del tubo freno possa allentarsi con le vibrazioni (D).

Tutta la bulloneria utilizzata per l'assemblaggio è di tipo 12,9 e i componenti in gomma sono testati con oli ad alta acidità. Le vernici utilizzate per la colorazione delle pinze freno sono ad alta resistenza a liquidi ed oli molto acidi.

Tutti gli impianti frenanti Omnicompetition, possono essere installati su qualsiasi vettura mantenendo comunque la pompa freno primaria di serie e non interferiscono con il sistema elettronico di frenata (ABS).

## NEW OMNICOMPETITION BRAKE CALIPERS

Omnicompetition brake calipers are designed and produced completely in our production department which is outfitted with CNC machine tools which guarantee high precision machining.

Omnicompetition calipers are obtained from aluminium alloy bars series 7000, which is particularly suitable for this purpose. This alloy mainly contains zinc which increases resistance and hardness and it favours the self-hardenability of this alloy. After the heat treatment, the aluminium alloy of series 7000 is extremely light and it has a very high mechanical resistance to tensile stress (maximum of 5800 km/cm<sup>2</sup>). For this reason, this special alloy is often used for aeronautical structures and/or highly stressed parts of means of transport.

Thanks to the new design, the caliper is now lighter while maintaining the technical and mechanical features.

In the 4 pot calipers, there are two pistons with diam. 36mm and two pistons with diam. 40mm, while in the 6 pot callipers there are four pistons with diam. 32mm and two pistons with diam. 36mm. Thanks to our many years of experience and to several tests both on track and on test-bed, we can consider the quality and pistons diameter/ brake power ratio to be optimal. As far as performance is concerned, it is the diameter of pistons to be decisive: the quantity of oil which is pushed by one piston is directly proportional to its diameter. Moreover, the great surface of the piston guarantees a large base plane of pushing of the piston on the pad and, consequently, guarantees the maximum grip between the pads and the rotor.

Another technical innovation is on the oil channel of the caliper: it is now open and circular in order to grant the same pressure of oil in all the pistons. The new caliper, has a spring steel spring which, touching the pads, prevents vibrations (A). On the sides there are cups and bleed nipples (C) which enable the installation of the caliper on both sides. On the top there is a special black support to avoid even the slightest banding of the caliper (B).

The connection of the brake pipe is completely renewed as well: a new rack avoids the eventual loosening of the brake pipe due to vibrations (D). The bolts used for the assembly are 12.9 and the rubber parts are tested with acid oils.

The paint of Omnicompetition calipers is highly resistant to acid fluids and oils.

Omnicompetition brake systems can be installed in any cars without changing the original brake pump and they do not interfere with the electrical braking system (ABS).

## NOUVELLES ETRIERES DE FREIN OMNICOMPETITION

Les étriers de frein Omnicompetition sont entièrement projetées et construites dans notre établissement à l'aide de machines outils CNC qui garantissent une précision optimale.

Elles sont fabriquées à partir de barres d'aluminium 7000, particulièrement adaptées à cet emploi. Cet alliage contient principalement du zinc, élément qui en augmente la résistance et la dureté en plus d'en favoriser l'auto-trempabilité. Après le traitement thermique, l'alliage d'aluminium de série 7000 se révèle être extrêmement léger et doté d'une résistance mécanique à la traction très élevée (égale à un maximum de 5800 kg/cm<sup>2</sup>). C'est pour cette raison qu'il est généralement utilisé pour la fabrication de structures aéronautique et/ou de pièces particulièrement sollicitées de moyens de transports.

Le nouveau design de l'étrier permet d'obtenir un produit plus léger mais qui conserve intactes ses caractéristiques techniques et mécaniques. Dans les étriers à 4 pistons sont logés 2 pistons de 32 mm de diamètre et 2 pistons de 40 mm de diamètre alors que pour la version à 6 pistons, il y a 4 pistons de 32 mm et 2 pistons de 36 mm. Des années d'expérience et de nombreux tests sur piste ou sur banc d'essai nous permettent d'assurer un rapport quantité/diamètre des pistons optimal ainsi qu'une excellente force freinante. Précisons qu'au niveau des prestations, le diamètre des pistons est déterminant. La quantité d'huile poussée par le piston est directement proportionnel au diamètre de ce dernier. En outre, un diamètre élevé des pistons garanti une plus grande surface d'appui sur le plan de poussé de la pastille et donc un maximum de prise entre les plaquettes et la piste freinante. Une innovation technique importante concerne le système de passage de l'huile à l'intérieur de la pince: le circuit est ouvert et circulaire afin de garantir la même répartition d'huile sur tout les pistons.

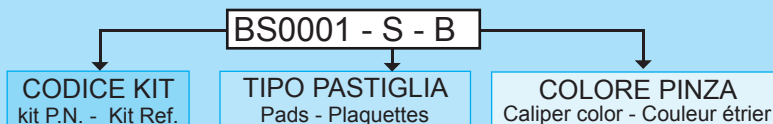

La nouvelle étrier a un ressort en acier à ressorts qui, en touchant la plaquette de frein, en elimine toute vibration (A). Sur les cotés s'alternent vis de purge et bouchons (C) qui permettent d'installer l'étrier des deux côtés et on a fixé un cache de renfort sur la partie supérieure afin d'éviter que la pince ne se plie (B).

Le branchement au tube de frein a lui aussi été entièrement revue: une crémaillère a été créée afin d'éviter qu'il se détache avec les vibrations (D) Toute la boulonnerie utilisée pour l'assemblage est de type 12,9 et les composants en caoutchouc sont testés avec des huiles à haute acidité. Les étriers sont peintes à l'aide d'une peinture spécialement étudiée pour résister aux liquides et aux huiles très acides. Les kits gros freins Omnicompetition peuvent être installés sur tous type de véhicules en gardant la pompe frein d'origine de série et sans interférer avec le système électronique de freinage (ABS).

## DISCHI FRENO BAFFATI E FORATI

I dischi freno baffati e forati **OMNICOMPETITION**, ventilati o monolitici, vengono prodotti con una particolare lega di ghisa caratterizzata da un alto coefficiente di attrito. Ideali per un tuning tecnico, sono indicati per qualsiasi vettura stradale, in quanto aumentano e garantiscono la costanza delle prestazioni delle vetture di serie.

Ogni fascia frenante richiede uno specifico disegno dei fori, programmato con una macchina a controllo numerico, per evitare che la foratura interferisca con le alette interne di raffreddamento. I fori consentono l'eliminazione dei gas di fading e delle polveri generate durante la frenata, mentre le baffature mantengono le pastiglie freno sempre pulite e ravvivate migliorando così la costanza di frenata. Dopo la baffatura e la foratura, i dischi freno **Omnicompetition** vengono bilanciati per evitare qualsiasi vibrazione.

Precisiamo che **Omnicompetition**, a richiesta del cliente, può realizzare dischi freno anche solo baffati o solo forati.

## GROOVED AND DRILLED BRAKE DISCS

Grooved and drilled **Omnicompetition** brake discs, both ventilated and monolithic, are produced with a particular cast iron alloy which is characterized by a high friction coefficient.

They are ideal for a technical tuning and they are indicated for any street car because they improve and assure the constancy of performances of the production cars.

Each rotor requires a specific drill pattern which is programmed and run with CNC (Computer numerical control) machines in order to avoid that holes interfere with internal cooling vanes. This drill pattern allows to expel the fading gas and the dust of breaking, while the grooves keep the pads clean thus improving the braking performance constancy.

After being grooved and drilled, **Omnicompetition** discs are balanced to prevent vibrations.

On request, **Omnicompetition** produces discs only grooved or only drilled as well.

## DISQUES DE FREIN RAINURÉS ET PERCÉS

Les disques de frein rainurés et percés **Omnicompetition**, ventilés ou monolithiques, sont fabriqués à partir d'un alliage en fonte caractérisé par son haut coefficient de frottement. Idéal pour un tuning "technique", ils sont indiqués pour toutes les voitures de tourisme car ils augmentent et garantissent la constance des performances des véhicules de série. Chaque bande freinante requiert un dessin spécifique des perforations, programmé par une machine à contrôle numérique, afin d'éviter que le forage interfère avec les ailettes internes de refroidissement. Les perforations permettent l'élimination des gaz de Fading et des poussières produites durant le freinage alors que les rainures maintiennent les pastilles de frein toujours propres et ravivées, améliorant ainsi la constance de freinage.

Après le rainurage et le perçage, les disques de frein **Omnicompetition** sont équilibrés pour éviter toute vibration. Précisons que **Omnicompetition** est en mesure de réaliser sur demande des disques avec la rainure ou le perçage uniquement.

## DISCHI FRENO COMPOSITI

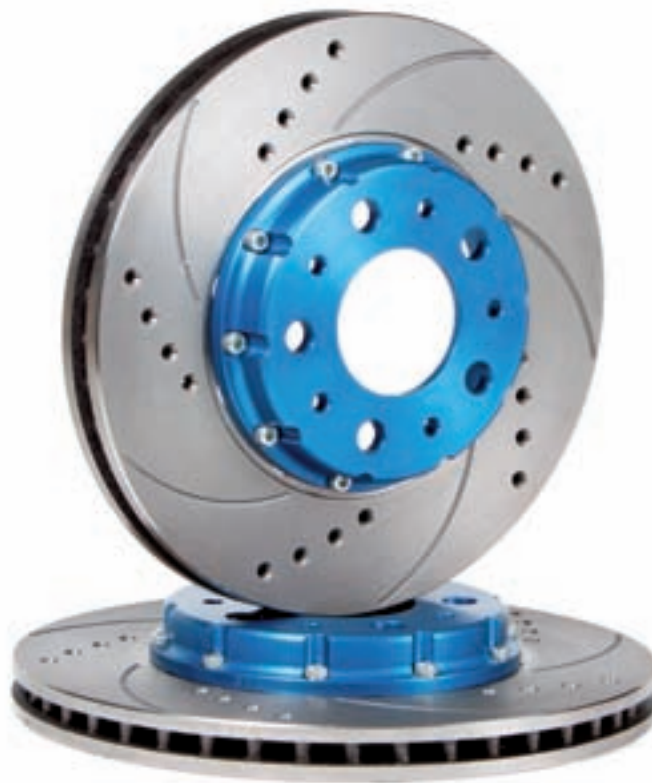

I dischi freno compositi **Omnicompetition** sono costituiti da due componenti di materiali differenti: fascia frenante in ghisa ad alto contenuto di carbonio e campana in Ergal - lega speciale di alluminio che permette la normale dilatazione dovuta allo scambio termico tra i due diversi elementi.

I vantaggi che derivano dalla realizzazione in due parti scomponibili risiedono nella notevole leggerezza acquisita dall'applicazione della campana centrale in ergal, nella migliore dissipazione del calore e nell'assoluta mancanza di vibrazioni alle alte temperature, grazie alla metodologia costruttiva della campanina e al tipo di applicazione della stessa.

Ogni fascia frenante richiede uno specifico disegno dei fori, programmato per non interferire con le alette di ventilazione interna e, alla serie di fori passanti svasati che consentono il raffreddamento del disco, sono affiancate delle baffature che permettono di ravvivare continuamente la pastiglia e garantire così la costanza delle prestazioni.

Oltre alla gamma proposta nel catalogo, i dischi compositi **Omnicompetition** vengono realizzati anche su richiesta del cliente e compatibilmente con la conformazione del disco originale, ovvero in base alle dimensioni e alla possibilità di applicare la campana in ergal alla fascia frenante uguale all'originale.

Sia le lavorazioni della fascia frenante (baffatura e/o foratura), che la colorazione della campana in Ergal (effettuata con processo di anodizzazione) possono essere realizzati a discrezione del cliente, pertanto Vi invitiamo a contattarci per qualsiasi preventivo personalizzato (anche, in un secondo momento, per l'acquisto di eventuali componenti di ricambio, ovvero solo campane o solo fasce).

## DISCS WITH ERGAL BELL

**Omnicompetition** discs with ergal bell are made up of two parts which are developed with different materials: the rotor is of cast iron with a high content of carbon and the bell is of Ergal, a special aluminium alloy which allows the normal dilatation due to the heat exchange of the two parts.

The advantages of these two different parts are numerous: the lightness of the central part with the ergal bell, the better heat dissipation and the absolutely absence of vibrations at high temperatures thanks to the production and installation method of the bell.

Each rotor requires a specific drill pattern which is programmed and run with CNC (computer numerical control) machines in order to avoid that holes interfere with internal cooling vanes. To this drill pattern, which allows to expel the fading gas and the dust of breaking, grooves are added to keep the pads clean and improve the breaking performance constancy.

In addition to the catalogue range, **Omnicompetition** produces customized discs with ergal bell on request, accordingly with the design of the original discs (it depends on the dimensions and on the possibility to install the ergal bell to one rotor like the original one).

Both the machining with grooves/holes of the rotor and the colouring (through anodizing process) of the ergal bell can be customized; we kindly invite you to contact us for any customized quotation (at a later date as well, in order to buy spare parts such as just rotors or bells).

## DISQUES DE FREIN COMPOSITES

Les disques de frein composites **Omnicompetition** sont constitués de deux éléments de matériaux différents: une bande de freinage en fonte à haute teneur en carbone et un bol en Ergal - alliage spécial d'aluminium qui permet une dilatation normale due aux échanges thermiques entre les deux composants.

Les avantages qui résultent de la fabrication en deux parties décomposables sont une légèreté considérable acquise grâce à l'application du bol centrale en Ergal, une meilleure dissipation de la chaleur et un manque absolu de vibration à température élevée grâce au mode de fabrication du bol et à son mode d'application.

Chaque bande freinante requière un dessin spécifique des perforations, programmé pour ne pas interférer avec les ailettes de ventilation internes et, à côté de la série de trous débouchant évasés qui permettent le refroidissement du disque, on a ajouté des rainures qui permettent de raviver constamment la pastille et de garantir ainsi la constance des prestations.

En plus de la gamme proposée dans le catalogue, les disques composites **Omnicompetition** peuvent être réalisés sur demande du client et conformément au disque original, c'est à dire suivant les dimensions et la possibilité d'appliquer le bol en Ergal à la bande freinante identique à l'originale.

Le travail de la bande freinante (rainurage et/ou perçage) ainsi que la coloration du bol en Ergal (effectuée par adonisation) peuvent être réalisés sur mesure, nous vous invitons donc à nous contacter pour l'établissement d'un devis personnalisé (ainsi que pour l'achat de pièces de rechange, bande ou bol seules, dans un second temps).

## PASTIGLIE FRENO Omnicompetition

Le pastiglie freno **Omnicompetition**, sono prodotte con materiale d'attrito di notevole qualità e garantiscono un'ottima capacità frenante anche in condizioni di alto stress.

La composizione dell'impasto con cui vengono realizzate è stata studiata e testata mirando a raggiungere 2 obiettivi: prevenire eventuali vibrazioni, grazie alla mescolanza di resine e fibre ed evitare eventuali rigature del disco freno limitandone l'usura, grazie alla mancanza di grossi granuli nell'impasto. Per quanto riguarda la durata della pastiglie freno, possiamo indicare una percorrenza media superiore ai 40.000 km.

## BRAKE PADS Omnicompetition

**Omnicompetition** brake pads are made up of high quality friction material and they assure very good braking power in high stress conditions as well.

The compound of these pads has been tested to fulfill two goals: to prevent any vibrations thanks to the mix of resins and fibres and to avoid any grazes on the discs by minimizing the wearing effect thanks to the lack of big grains in the compound. As far as the duration of these pads is concerned, Omnicompetition suggest an average distance over 40.000 Km.

## PLAQUETTES DE FREIN Omnicompetition

Les plaquettes de frein **Omnicompetition** sont réalisées à partir de matériaux de frottement de grande qualité garantissant ainsi une qualité de freinage optimale même en situation de grande sollicitation.

La composition des matériaux servant à leur construction à été étudiée et testée pour atteindre 2 objectifs: prévenir d'éventuelles vibrations, grâce à l'utilisation d'un mélange de résines et de fibres, et éviter d'éventuels rayures sur le disque du frein afin d'en limiter l'usure, grâce à l'absence de gros grains dans le mélange.

Quand à la durée de vie de la plaquette de frein, nous pouvons indiquer une distance moyenne supérieure à 40 000 km.

## CONDIZIONI DI VENDITA:

Il conferimento dell'ordine comporta l'accettazione delle ns. condizioni di vendita, qui di seguito riportate, che il committente dichiara di conoscere; eventuali modifiche, per essere valide, dovranno essere concordate precedentemente in forma scritta. I prezzi si intendono per merce franco ns. magazzino, IVA esclusa, non sono impegnativi e possono essere modificati senza preavviso.

Le ns. fatture devono essere pagate in contanti alla consegna, al ns. domicilio di S.Stefano di Zimella, salvo diversamente stabilito. Qualora in fattura venisse concordato un termine di pagamento, siamo autorizzati, per comodità di esazione, ad emettere una tratta o una ricevuta bancaria per il corrispondente importo alla scadenza.

Tratte, ricevute bancarie, cambiali, aperture di credito irrevocabili confermate, a copertura di fatture accettate o pagabili, anche se convenute ed emesse in luogo diverso, si intendono sempre salvo buon fine e, se non onorate alla scadenza, mantengono fermo ad ogni effetto l'obbligo del successivo pagamento delle fatture in contanti al ns. domicilio di S.Stefano di Zimella. Procedimenti di trasmissione di valuta dall'estero verso l'Italia non comportano modifica all'obbligo del pagamento al nostro domicilio di S.Stefano di Zimella.

Anche se riferito ad una data, il termine di consegna si intende approssimativo, salvo espresso accordo scritto dove esso diviene tassativo o essenziale. In ogni caso, Omnicompetition S.r.l. non è responsabile di ritardi dovuti a causa di forza maggiore, o indipendenti comunque da nostra volontà, quali incidenti, esplosioni, scioperi, disservizio postale, ferroviario, doganale, o di ogni altro mezzo di comunicazione o trasporto, rifiuti o ritardi da parte delle autorità a rilasciare licenze di importazione, esportazione o ritiro di licenze già rilasciate, difficoltà di approvvigionamento nei luoghi di produzione o altro ancora. In tutti questi casi, qualora la causa non comporti la definitiva impossibilità della fornitura, il termine di consegna, sia esso approssimativo o essenziale, si intenderà prorogato di una durata uguale a quella degli impedimenti che hanno causato il ritardo della fornitura.

Il mancato pagamento, anche parziale, di una fattura, oltre che l'addebito degli interessi di mora (vedi decreto legislativo 09/10/02 nr. 231), comporta l'automatica decadenza dei termini di pagamento e l'immediata esigibilità di qualsiasi fattura successiva, oltre al ns. diritto di emettere tratta a vista per il corrispondente importo. Tutte le vendite sono effettuate con riserva di proprietà; pertanto, la proprietà dei beni rimane del venditore fino al completo pagamento dell'importo dovuto.

La merce viene venduta franco ns. magazzino di S.Stefano di Zimella (VR) e viaggia a rischio e pericolo del committente anche se resa franco destino. Qualunque reclamo per danni od omissioni inerente al trasporto dovrà quindi essere fatto agli esecutori di esso. Qualsiasi tassa, imposta, dazio attuale o futuro, o aumento degli interessi è a carico esclusivo del compratore. All'arrivo della merce, il compratore è tenuto ad esaminarla ed a verificarne il peso, confezione, condizioni e caratteristiche poichè trascorsi 10 giorni dal ricevimento non si accettano eventuali reclami.

Per resi merce dovuti ad errate vostre ordinazioni verrà trattenuta dalla nota di accredito una somma pari al 15% del valore della merce resa con un minimo di € 20,00.

In caso di reclami resta fermo l'obbligo da parte del compratore del pagamento delle fatture alla loro scadenza, compresa quella cui si riferisce il reclamo. Qualora, previo accertamento da parte dei nostri tecnici, il reclamo risulti fondato ed il compratore sia in regola con i pagamenti, il nostro obbligo si limita al rimborso del prezzo indicato in fattura o, a nostra scelta, alla sostituzione della merce difettosa o non conforme precedentemente restituita. Il compratore rinuncia a qualsiasi risarcimento di danno o rimborso spese. Non si accettano resi di merce totalmente o parzialmente lavorata.

Il presente contratto, anche se concluso all'estero, la sua formazione, interpretazione ed esecuzione si intendono regolati esclusivamente dalle leggi italiane integrati dalle norme internazionali INCOTERMS nei testi redatti in lingua italiana.

Per qualsiasi controversia inerente al presente contratto sarà esclusivamente competente l'autorità giudiziaria, in particolare il foro di Verona.

**Omicompetition S.r.l.**

## TERMS OF SALES:

All our sales are subjected to the following conditions of sale that rule all purchasing conditions, with the exception of formal and express derogation of the company OMNICOPEITION. All received orders are considered as accepted by OMNICOPEITION only after the issue of a written order confirmation.

Our price list is based on Ex-works terms. All goods, even if delivered free of charge, are delivered at buyer's risk and peril. All complaints on visible faults or on the non-conformity of received articles shall be sent in writing within eight days from receipt of goods. In case of visible faults or non-conformity duly confirmed by OMNICOPEITION, the buyer will be granted the replacement or the reimbursement of the goods, with the exclusion of any claim for indemnity, damages or interests. By way of an exception OMNICOPEITION can accept the returns of goods for any other reason only by previous written agreement, if goods are sent in their original packing without being used and delivered free of charge within 15 days after receipt. OMNICOPEITION will accept these returns of goods and issue a credit note by deducting a lump sum of 15% on the invoiced amount. All goods returned without our authorization and not respecting the condition above given, even if they are received by our company, cannot be considered as part of this agreement.

Our goods are invoiced at the prices in force at the date of order receipt and shall be payable cash. Failing the written confirmation for any particular reason not attributable to us ( including fax, e-mail, etc...) our goods will be invoiced at the prices in force at the date of our order confirmation. These conditions of sale may be modified if the buyer does not update his current bank and commercial references or if these are not more acceptable. By way of penal clause and according to the provisions of the law, all amounts due at their expire date, which are still 4 days after the bringing of a default action, will lead to a penalty for delay in payment equal to 2 times the legal interest rate which shall be applied to the remaining amounts due. In case of delay in payment, the company OMNICOPEITION can suspend any delivery.

To benefit from the guarantee, it is essential that the goods shall be assembled by a technician who has all necessary competence and tooling. The guarantee of the products we commercialise undergoes the Italian laws DPR224 of 1988 and D.Lgs. 24 of 2002. The guarantee is restricted to the simple replacement of goods without any other compensation cannot be claimed. The guarantee cannot be applied in the following cases: usage in competitions, inobservance of the assembling instruction, wrong usage, incorrect assembling. For each request of guarantee, all pieces shall be returned free of charge to OMNICOPEITION with a covering letter explaining the reason of the problem and a copy of the invoice or consignment note. For all request of guarantee concerning pistons, the cylinder shall be included in the parcel.

Legal and beneficial ownership of the goods shall remain at OMNICOPEITION until full payment for the goods has been made. In conformity with this clause, the issue of a certificate with obligation to pay (draft or other) does not constitute the payment. The lack of payment at any of the expiries due, even if agreed, can lead to the claiming to the goods. For items returned due to any order mistakes, we will deduct 15% from the credit note with 20 euro as a minimum charge.

These dispositions do not constitute an obstacle to transfer to the buyer, right from delivery, to the risks of loss and deterioration of goods as well as the damages that may occur. Right from the resale, the buyer commits himself to settle immediately to the seller the remaining amount due, all delays of payment agreed upon with the signing of the contract become, by explicit will between the parties, invalid.

Any claim or dispute arising from the sales of goods, even if in case of guarantee appeal or majority of defendants, shall fall under the exclusive jurisdiction of the Court of Commerce within the competence where our company is situated.
