

CONSTRUCTION MACHINERIES, RAILWAYS, MANIPULATION VEHICLES

PRODUCTION, REFURBUISHING, DISTRIBUTION

All the brake and clutch parts of construction machineries, railways, manipulation vehicles and agriculture vehicles are under a extreme challenge. The usage of friction materials for those brake and clutch kits of those above listed vehicles must therefore meets the producers specifications in order to ensure non problematical run as well. There is other invisible condition, especially in the cases of elevators and railways, to keep the safety standards regarding the appropriate safety standards upon homologations issued by relevant state authorities.

All the products from choosen producers and suppliers for original equipments, which are the subject of the contracted distribution, meet the required homologation conditions. The authorized production and refurbishing of all parts is made by approved technologies strictly connected with the usage of homologated friction materials only.

BRAKE SHOE ELEVATOR 120x100x8 SWR
